DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 19-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Nagatani et al (US 5,399,850).

Regarding claim 19, Nagatani discloses a light conductor comprising: a first surface for receiving light; a second surface for allowing the light to exit; and a plurality of indents defined by the second surface, each indent being provided with an inclined portion slanted relative to the first surface (Fig 3; Col 9 Lines 3-44).

For claim 20, Nagatani teaches a light conductor comprising: a first transparent member provided with a first light receiving surface and a first light emitting surface opposite the first light receiving surface, at least either one of the first light receiving surface and the first light emitting surface being formed with a convex portion; and a second transparent member formed separately from the first transparent member and provided with a second light receiving surface held in facing relation to the first light emitting surface of the first transparent member, the second transparent member being also provided with a second light emitting surface for allowing light to exit (Fig 3; Col 9 Lines 3-44).
